Goodrich Technology Corporation Limited Warranty

Goodrich Technology Corporation (GTC) provides a limited warranty to the original purchaser, under normal and intended for a period of 7 years, from the original date of purchase. GTC agrees to repair at GTC's sole discretion, without charge, any part which is returned to Goodrich Technology Corporation, 670-A Garcia Ave., Pittsburg, CA 94565 (freight prepaid) with a copy of the original sales receipt and which, after examination, shows that the product has failed in normal use and service due to defects in material and/or workmanship in the form of delaminating or yellowing. Such repair or refinishing shall not include removal or installation. This express warranty is not applicable to GTC products which, have been subjected to modifications or corrosion of the finish due to neglect, chemicals, and/or adverse weather conditions.

GTC hereby disclaims all other express warranties or implied warranties. GTC also retains the right to modify this warranty at any time.

Transfer of title of any GTC products by the original owner voids the warranty.

This warranty gives you specific legal rights and there may also have other rights under state laws. No warranty or representation by anyone other than GTC will be binding to the manufacturer.

Quality control personnel will review all defect returns and any defects not found to be GTC's responsibility will be returned to the sender at their expense. Appearance defects will not be honored if:

1. Damage or modified in any way.
2. PermaStar™ finish has been damaged by improper maintenance or improper cleaning agents other than those recommended in the cleaning instructions as stated herein. This is why evidence of harsh cleaning methods described on this card will be void of all warranties. Please follow the instructions carefully.

Important Technical Information Regarding Wheel Care

Parts coated with the PermaStar™ finish require some periodical cleaning with only mild soap and water in order to maintain the factory appearance. The following steps shall help safeguard the finish.

1. When you first take receipt of your wheels or parts coated with PermaStar®, it is a good idea to apply a high quality, clear coat safe, protective wax to the finish to protect it in during installation or mounting.
2. Regular cleaning with mild soap and water is required to remove road soils, brake dust and road salts that can trap moisture and cause corrosion over a period of time. Brake dust is itself corrosive and can cause pitting of the finish. These soils should be removed regularly. After cleaning a coat of protective wax that is "Clear Coat Safe" will help preserve the finish.
3. If minor scratches do occur, they may be removed by using a high quality fine polish (Not a Chrome Polish) or scratch remover that is "Clear Coat Safe"
4. Never clean parts coated with PermaStar™ with scouring pads or metal polishes. Steam cleaning should also be avoided. Use caution around automatic car washes, since acidic preparations are often used to remove wheel soils. When cleaning tires use caution. Never allow steel wool or hard bristle brush to come in contact with the finish. Never allow any harsh chemicals or tire cleaners to come in contact with finish. This could damage the appearance of the finish permanently.
